# Psychotherapy

*Past, present and future  
of psychotherapy is in your hands!*

Prof. Dr. Victor Makarov

Editor-in-Chief of World Journal "Psychotherapy"  
President of the Russian Professional Psychotherapeutic League  
President of the Asian Federation of Psychotherapy  
Vice-President of the World Council For Psychotherapy

I am honored to declare the beginning of the work on the creation of the World Journal "Psychotherapy". The mission of the magazine is unique — it is not only to be the organizer of the universal information space in psychotherapeutic practice and science but also to become the information ground for the process of standardization of psychotherapy as an independent profession which effectiveness can be achieved through the synthesis of general scientific methods and individual creative approaches, through the synthesis of rational standards of the West and intuitive approaches of the East.

We are creating a magazine so that anyone interested in perceiving psychotherapy could find the answers to his questions in it:

- a student — on education in the field of psychotherapy;
- a young specialist — on technologies, methods and psychotherapeutic techniques;
- an advanced expert — on how the other professionals in his country and all over the world work;
- we would also like a scholar wise with experience to be able to share the results and prospects of his long-term work.

Our big 240 -page magazine will contain various materials on the past, present and future of psychotherapy:

- our past is rich in achievements. However, it is rather short and, at times, it is rather dramatic;
- our present is vast and full of facts and events that often are available only to a small group of psychotherapists in a certain country and not known to the community on the whole;
- our future has already arrived. It's unbelievable and will exceed our boldest expectations.

With your participation, our world journal will undoubtedly contribute to a better understanding of psychotherapy and will give another impulse to its further development!
